Where will things persist?

- Conception: Filling an information gap
- CA state funding, to inform the State Wildlife Action Plan 2015 revision

A Climate Change Vulnerability Assessment of California's Terrestrial Vegetation

Prepared for the California Department of Fish and Wildlife by the
University of California, Davis

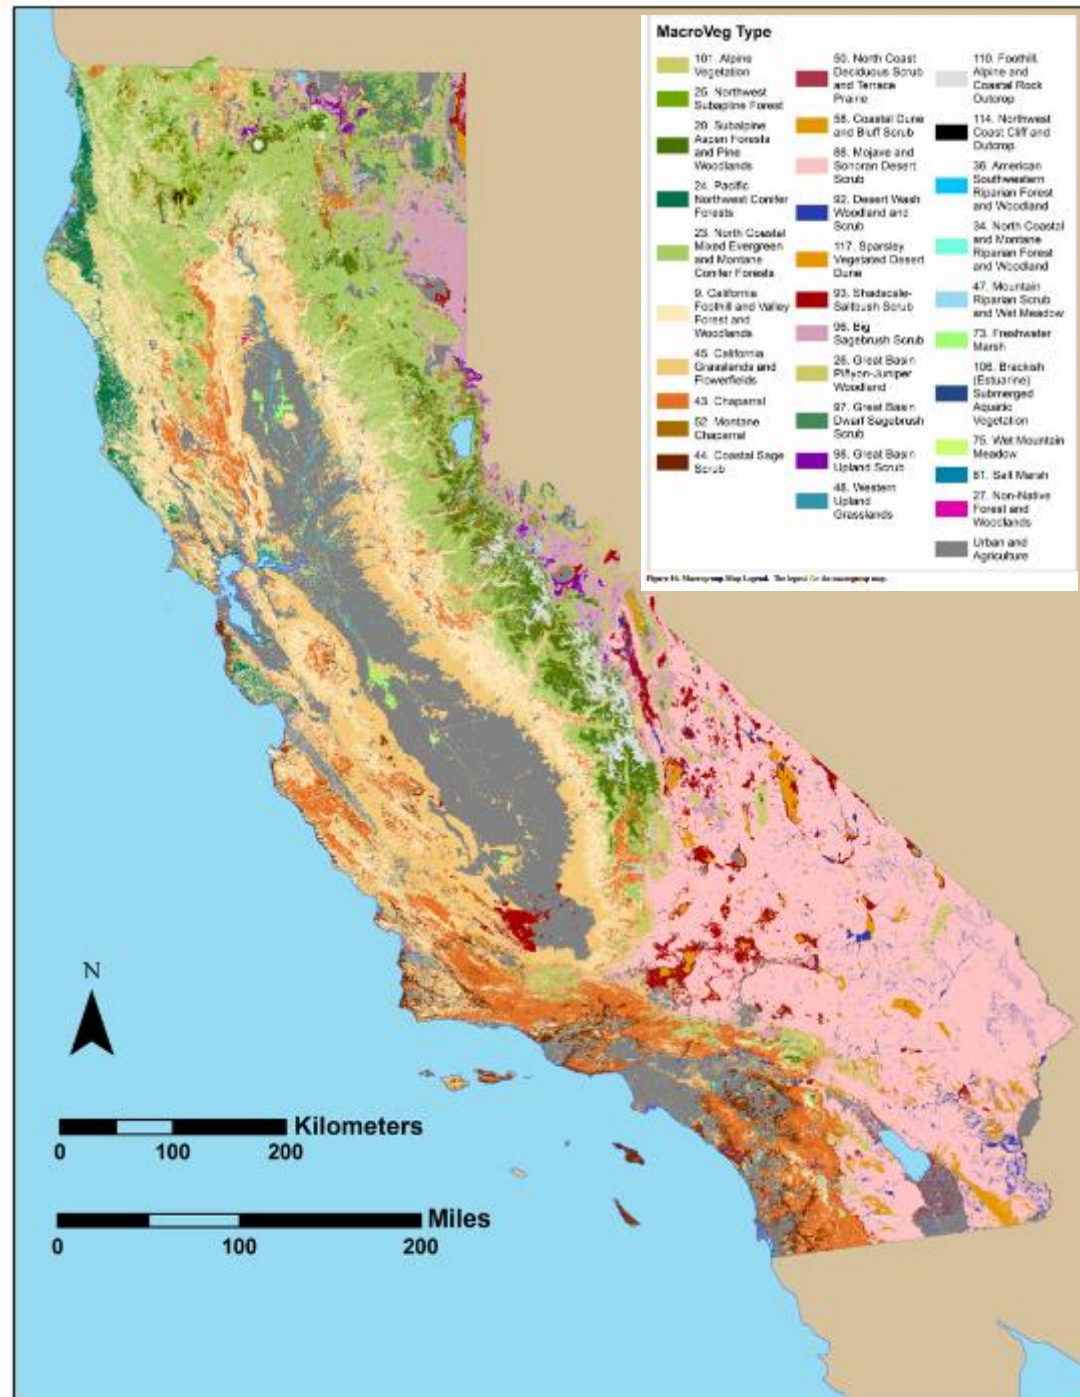

Using Vegetation Maps to Visualize Climate Risk

2015 Vegetation Map + Maps of Climate Change

Combine the most recent vegetation map of California with climate data.

This allows leverage of as much as we know about the distribution of the vegetation.

MIROC

A scenic view of a forested mountain valley. In the foreground, several thin branches of a cherry tree are covered in vibrant pink blossoms. The background shows a lush green valley with dense forest, interspersed with rocky outcrops and ridges. The overall atmosphere is peaceful and natural.

Thank you!
